PROVISIONS

"At time of proof of appropriation, the well covered under this water right must be connected with the wells covered under water right G2-25248 and G2-26012 if supplemental coverage listed on this application is to continue."

"Prior to certification of this application, supplemental water rights covered under water right application No. G2-26012 must be relinquished."

"Meter readings shall be recorded monthly and a summary of the monthly totals shall be submitted to the Southwest Regional Office of the Department of Ecology by February 1, of each year."

An approved measuring device shall be installed and maintained in accordance with RCW 90.03.360, WAC 508-64-020 through -040 (installation, operation, and maintenance requirements are attached).

Installation and maintenance of an access port as described in Ground Water Bulletin No. 1 is required. An air line and gauge may be installed in addition to the access port.

All water wells constructed within the state shall meet the minimum standards for construction and maintenance as provided under RCW 18.104, Washington Water Well Construction Act of 1972, and Chapter 173-160 WAC, Minimum Standards for Construction and Maintenance of Wells.

The Water Resources Act of 1971 specifies certain criteria regarding utilization and management of the waters of the state in the best public interest. Use of water may be subject to regulation at certain times, based on the necessity to maintain water quantities sufficient for preservation of the natural environment.

A well log of the well shall be submitted by the driller to the Department of Ecology within 30 days of completing this well. This well log shall be complete and all information concerning the static water level in the well, in addition to any pump test data, shall be submitted as it is obtained.

In accordance with WAC 173-160-205, wells shall not be located within certain minimum distances of potential sources of contamination. These minimum distances shall comply with local health regulations, as appropriate. In general, wells shall be located at least 100 feet from a sewer, septic tank, privy, or other source of contamination. Wells shall not be located within 1,000 feet of a solid waste landfill.

This permit is subject to the implementation of the minimum requirements established in the Interim Guidelines for Public Water systems Regarding Water Use Reporting, Demand Forecasting Methodology and Conservation Programs, July 1990, which are attached.

This permit shall be subject to cancellation should the permittee fail to comply with the above development schedule and/or fail to give notice to the Department of Ecology on forms provided by that Department documenting such compliance.

Given under my hand and the seal of this office at Olympia, Washington,

this 17th day of July, 19 91.
